### **Study Skills Course: Effective Studying in 6 weeks**

The course "Effective Studying" has been offered by the Student Service Centre of the University of Groningen for many years. Every year more students register for this course. In the academic year 2009-2010 this course has been given 22 times for 12 students per course. Students evaluations are very positive.

In this workshop we will explain what we do during this course. There are two main topics: Study Planning and Studying Text. We will give you the outline of this 6 weeks (2 hours per week) course. From week to week we will show you what we do and explain why we do it.

After this presentation participants will have an outline of a course on study skills.
